Target Positions

Full Stack Developer

Software Engineer

Data Engineer

TORTAKUL SAELAO

👤 Introduction

Computer Engineering graduate with a 3.84 GPA from KMITL and 6 months of full-stack internship experience at SCG. Proficient in building production-grade web applications using React, Next.js, TypeScript, and Node.js including a platform currently serving 200+ active users. Comfortable working across the full stack from database design to frontend UI, with additional exposure to IoT systems and real-time data pipelines.

🎓 Education

King Mongkut's Institute of Technology Ladkrabang Prince of Chumphon Campus
Bachelor of Engineering in Computer Engineering
GPA: 3.84
2022 - 2026

📋 WORK EXPERIENCE

Web Application for Transportation Reservation
SCG (THUNG SONG) Co., Ltd. April – October 2025
Full Stack Developer Intern

- Built with Next.js, Express.js, and TypeScript

Developed an internal web application that streamlines transportation and hotel booking management for company employees. The platform currently supports more than 200 active users and is continuously enhanced through API integrations, optimized database queries and backend workflows and automation scripting to maintain reliable 24/7 system availability.

📋 PERSONAL PROJECT

Web Application POS-Project

- Built with React, Express.js, and Python

This project uses a Raspberry Pi 4 to communicate with backend services through API calls for transaction processing and database management. The system sends commands to Python scripts for hardware control and includes a dashboard for monitoring sales and inventory data.

Internship Logbook Management System

- Built with Next.JS, TypeScript and Tailwindcss.

Developed a full-stack internship management platform featuring role-based authentication and access control for students, supervisors, and administrators.
